

| Qualifier | Dataset A | Dataset B | Total |
|--|-----------|-----------|-------|
| always: "in 100% of cases" | 1 | 3 | 4 |
| can always: "can in 100% of cases" | 0 | 1 | 1 |
| generally: "in at least 90% of cases" | 21 | 8 | 29 |
| can generally: "can in at least 90% of cases" | 10 | 7 | 17 |
| mostly: "in at least 50% of cases" | 1 | 2 | 3 |
| can mostly: "can in at least 50% of cases" | 0 | 0 | 0 |
| frequently: "in at least 10% of cases" | 3 | 0 | 3 |
| can frequently: "can in at least 10% of cases" | 0 | 0 | 0 |
| sometimes: "in at least 0.10% of cases" | 3 | 1 | 4 |
| can sometimes: "can in at least 0.10% of cases" | 1 | 0 | 1 |
| never: "in 0% of cases" | 0 | 0 | 0 |
| can never: "can in 0% of cases" | 0 | 0 | 0 |
| generally not: "in at most 10% of cases" | 4 | 1 | 5 |
| can generally not: "can in at most 10% of cases" | 0 | 0 | 0 |
| mostly not: "in at most 50% of cases" | 1 | 0 | 1 |

| Relation | Dataset A | Dataset B | Total |
|---|-----------|-----------|-----------|
| is same as: "[subj] and [obj] are the same individual" | 7 | 5 | 12 |
| compares to: "[quantifiable subj] compares to the [quantifiable obj]" | 0 | 0 | 0 |
| has similar value as: "[quantifiable subj] has a value that is similar with [quantifiable obj]" | 0 | 0 | 0 |
| has same value as: "[quantifiable subj] has the same value as [quantifiable obj]" | 0 | 0 | 0 |
| has different value from: "[quantifiable subj] has a value that is different from [quantifiable obj]" | 0 | 0 | 0 |
| has smaller value than: "[quantifiable subj] has a smaller value than [quantifiable obj]" | 1 | 0 | 1 |
| has larger value than: "[quantifiable subj] has a larger value than [quantifiable obj]" | 6 | 2 | 8 |
| has causal relation with: "[subj] has causal relation with [obj]" | 0 | 0 | 0 |
| affects: "[subj] affects the activity of [obj] in the sense of positively or negatively affecting its intensity or frequency" | 1 | 1 | 2 |
| contributes to: "[subj] contributes to the activity of [obj] in sense of positively affecting its intensity or frequency" | 11 | 0 | 11 |
| enables: "[subj] causes the activity of [obj] to happen" | 2 | 4 | 6 |
| inhibits: "[subj] inhibits the activity of [obj] in sense of negatively affecting its intensity or frequency" | 1 | 1 | 2 |
| prevents: "[subj] causes the activity [obj] not to happen" | 1 | 0 | 1 |
| increases: "[subj] causes the value of [obj] to increase" | 4 | 0 | 4 |
| decreases: "[subj] causes the value of [obj] to decrease" | 2 | 1 | 3 |
| requires: "[subj] would not exist if [obj] did not exist" | 3 | 1 | 4 |
| causes: "[subj] causes the existence of [obj]" | 1 | 4 | 5 |
| is necessary and sufficient for: "[subj] causes the existence of [obj], and [obj] would not exist if [subj] did not exist" | 2 | 0 | 2 |
| is caused by: "the existence of [subj] is caused by [obj]" | 2 | 1 | 3 |
| has spatio-temporal relation with: "[subj] has a spatial and/or temporal relation with [obj]" | 0 | 0 | 0 |
| includes: "[subj] spatio-temporally includes [obj]" | 2 | 3 | 5 |
| is included in: "[obj] spatiotemporally includes [subj]" | 0 | 0 | 0 |
| co-occurs with: "[subj] is close to [obj] in terms of space and time" | 1 | 0 | 1 |
| is followed by: "[subj] comes into existence before [obj]" | 0 | 0 | 0 |
| follows: "[obj] comes into existence before [subj]" | 0 | 0 | 0 |
